## Lead Software Developer

### Description

We are looking to hire a Lead Software Developer for a client. This role will lead a team of developers, driving the design, development, and deployment of robust, scalable software solutions. This role will also ensure projects are completed on time, while maintaining the highest coding standards.

### Responsibilities

- Lead and mentor a team of software developers, fostering a collaborative and productive work environment. Design, develop, and deploy cloud-based applications using AWS, Azure, or GCP.
- Design, develop, and deploy cloud-based applications, ensuring high performance, scalability, and security.
- Collaborate closely with cross-functional teams, including product management, QA, and operations, to define project requirements and deliverables.
- Mentor and guide junior developers, providing technical leadership.
- Stay current with emerging technologies and industry trends, particularly in cloud computing, to ensure our solutions remain cutting-edge.
- Troubleshoot and resolve complex technical issues, providing guidance and support to team members as needed.

### Qualifications

- Bachelor's Degree in Information Technology, Computer Engineering, or a related field (or equivalent experience).
- Demonstrated proficiency in cloud platforms such as AWS, Azure, or GCP, with a strong understanding of cloud architecture and services.
- 5+ years of experience in software development.
- Proven ability to lead and manage a team, with strong project management skills.
- Excellent problem-solving skills, with the ability to think critically and provide innovative solutions.
