IT Infrastructure and Security Architecture Specialist

Hiring organization
Accents Jobs

Description

We are hiring an experienced IT Infrastructure and Security Architecture Specialist to provide technical consulting and expert guidance for our client's IT system. In this role, the candidate will help optimize system performance, reduce costs, secure our infrastructure, and guide cloud migration efforts.

Job Location

Pontiac, Michigan, United States

Date posted

August 26, 2024

Responsibilities

- Provide expert advice on IT infrastructure, network, cloud, application, and IT security architecture to improve system performance and efficiency.
- Conduct research and recommend alternative solutions, methodologies, and tools to enhance system capabilities, reduce costs, and optimize resource usage.
- Develop and recommend strategies for securing systems, ensuring robust protection against threats.
- Provide guidance on migrating systems to the cloud, ensuring a smooth and secure transition.
- Offer insights on database management, standardization, interface processes, algorithms, and system assurance to maximize system performance and reliability.

Qualifications

- Bachelor's degree in computer science or relevant field.
- Proven experience in IT infrastructure, network, cloud services, and security architecture.
- Experience with analyzing complex datasets and connecting the dots to draw insights and make meaningful conclusions.
- Ability to research and identify innovative solutions to improve system performance and security.
- Familiarity with various technologies, tools, and methodologies for optimizing IT environments.
- Proficiency in verbal and written communication to leadership.
- Strong analytical and problem-solving skills.
