Application and Systems Testing Professional

Description
We are looking to hire an Applications and Systems Testing professional for a client. The candidate will provide comprehensive testing support services for HR applications.

Responsibilities

- Develop and manage test automation frameworks that are maintainable and modular.

- Create and manage reusable test data and Cloud-based test infrastructure.

- Conduct user acceptance testing, unit testing, and integration testing.

- Perform application testing as part of integrated software development services or as an independent work stream.

- Provide all necessary labour, administration, and management to ensure effective testing support.

Qualifications

- Bachelor's degree in computer science, Information Technology, or a related field.

- Proven experience in applications and systems testing, including test automation and Cloud-based infrastructure.

- Strong understanding of user acceptance testing, unit testing, and integration testing.

- Experience in developing and managing modular and reusable test frameworks.

- Excellent analytical, communication, and problem-solving skills.

- Ability to collaborate effectively with cross-functional teams.
- Strong organizational skills and ability to manage multiple or competing priorities.
